

**UWS** UNIVERSITY OF THE  
WEST *of* SCOTLAND

## **Course Outline**

# The Promise

You: Bright people interested in a (reasonably) novel data collection method.

Us: Expert in generating and handling digital data in arts, humanities and social sciences.

The promise:

- Good grasp of the nature and structure of digital data.
- Able to collect data from the web using computational methods.
- Cognisant of ethical, legal implications.

# Overview

## Day 1:

- Fundamentals of digital data
- Examples of creative/computational research

## Day 2:

- Fundamentals of computational methods
- Demonstrations and practicals using Python

## Day 3:

- Ethics / legal / technical implications
- Participant project

# Online Format

Mix of self-directed practicals and group discussions.

Default settings: microphones off, camera is your choice.

Some of the instructor-led components will be recorded – we'll make this clear in each case.

Relationships -> interactions -> learning.

# Questions and Comments
